Subject Index

A

Absorption fractionation 182
Acetolactate synthase mutant 91–96
Acipenseriformes, ploidy levels 427–430
Aedes aegypti, linkage map 241–247
African wild dogs, genetic and morphological analyses of 450–459
Albinism, in sheep 67–69
Alcohol dehydrogenase, gene of barley 31–32
Allele extinction, prevention of 329
Alleles, deleterious
  fixation in finite populations 321–325
Allelic selection, in mice 49–56
Allozyme variation
  in mollusks 254–255
  reduction as a consequence of bottlenecks 446
  in Sitka spruce 206–211
American oysters, overdominance in 254–258
Amphimixis *see also* Sex
  classification of hypotheses on 372–387
α-Amylase, gene of barley 30–32
Anemia, congenital 263–265
Anopheles aquasalis, population differentiation 248–253
Anthocyanin, mutation in soybeans 297–300
Apis mellifera see Honeybees
Apomixis
  versus amphimixis 372–387
  explanation for rarity of 343–344
  in pearl millet 112–115, 213–216
Arabidopsis
  triazolopyrimidine resistance 91–96
  variegated mutants of 138–140
Asexual reproduction *see* Apomixis
Avocados, skin color, flowering group, and scent 82–84

B

Bacillus subtilis, transformation in 365–368
Backcrossing programs 212–213
Bacteria
  parasitic nature of conjugation 352
  role of sex in evolution of 326–327
Band sharing, to estimate genetic similarity 166–167
Barley
  chromosome aberrations in callus cells 105–108
  genetic variation of multigene families 29–33
  parental genomes in hybrids 78–82
Bicyclus anynana see Butterflies, African satyrid
Biparental inheritance 417
Blood groups, in short-tailed opossums 181–183
Boophilus see Ticks
Booroola fecundity gene 43, 44, 48
Bradyrhizobium, response of soybeans to 110
Breeding system
  effect on rate of molecular evolution 321–325
  relation to genetic variance 346–347
Butterflies, African satyrid
  DNA fingerprinting of 195–200

C

Canids, wolf-like
  phylogenetic position of wild dogs in 451, 458
Capra hircus see Goats
Catalase-3 gene, in maize 133–135
Catfishes, genome size in half-sib families 122–125
Cats, domestic
  expressivity of Manx gene 170–172
  genetic diversity among populations 173–180
Cattle
  congenital diseases of 263–265
  determining relationship coefficient in 166–169
C-banding
  of alloplasmic wheat 126–127
  of gazelle chromosomes 479
Centrarchidae, linkage analysis of 116–121
Cervinae, evolutionary relationships among 266–273
Chickens, microsatellite repeats 274–280
Chi-square values, programs to estimate significance of 152
Chloroplast DNA, maternal inheritance in *Eucalyptus* 218–220
Chromosomal aberrations, in barley 105–108
Chromosomal analysis, of *Drosophila* 63–66
Chromosome imprinting 232
Cladistic analysis, of deer 268
Cleidocranial dysplasia, in mice 466–474
Clones, versus maintenance of sex 388–395
Coadaptation 43
Common beans
  reaction to metobromuron herbicide 21–24
  unifoliate mutations 17–20
Competence 401–404
Computer programs
  to calculate kinship coefficients 238
  to calculate variance of heterozygosity 86
  to compare nucleotide divergence to restriction sites 317
  to determine allelic selection 51–52
  to estimate melting temperature of DNA 236
  to estimate optimum sample size 85–86
  to estimate significance of chi-square values 152
Conjugation 411–413
Coturnix japonica see Japanese quail
Crassostrea gigas see Pacific oysters
Crassostrea virginia see American oysters
Culling, independent 316
Cycling 329

D

Deer, evolutionary relationships among genera 266–273

Subject Index

A

Absorption fractionation 182
Acetolactate synthase mutant 91–96
Acipenseriformes, ploidy levels 427–430

Bacillus subtilis, transformation in 365–368
Backcrossing programs 212–213
Bacteria
  parasitic nature of conjugation 352
  role of sex in evolution of 326–327
Band sharing, to estimate genetic similarity 166–167
Barley
  chromosome aberrations in callus cells 105–108
  genetic variation of multigene families 29–33
  parental genomes in hybrids 78–82
Bicyclus anynana see Butterflies, African satyrid
Biparental inheritance 417
Blood groups, in short-tailed opossums 181–183
Boophilus see Ticks
Booroola fecundity gene 43, 44, 48
Bradyrhizobium, response of soybeans to 110
Breeding system
  effect on rate of molecular evolution 321–325
  relation to genetic variance 346–347
Butterflies, African satyrid
  DNA fingerprinting of 195–200

C

Canids, wolf-like
  phylogenetic position of wild dogs in 451, 458
Capra hircus see Goats
Catalase-3 gene, in maize 133–135
Catfishes, genome size in half-sib families 122–125
Cats, domestic
  expressivity of Manx gene 170–172
  genetic diversity among populations 173–180
Cattle
  congenital diseases of 263–265
  determining relationship coefficient in 166–169
C-banding
  of alloplasmic wheat 126–127
  of gazelle chromosomes 479
Centrarchidae, linkage analysis of 116–121
Cervinae, evolutionary relationships among 266–273
Chickens, microsatellite repeats 274–280
Chi-square values, programs to estimate significance of 152
Chloroplast DNA, maternal inheritance in *Eucalyptus* 218–220
Chromosomal aberrations, in barley 105–108
Chromosomal analysis, of *Drosophila* 63–66
Chromosome imprinting 232
Cladistic analysis, of deer 268
Cleidocranial dysplasia, in mice 466–474
Clones, versus maintenance of sex 388–395
Coadaptation 43
Common beans
  reaction to metobromuron herbicide 21–24
  unifoliate mutations 17–20
Competence 401–404
Computer programs
  to calculate kinship coefficients 238
  to calculate variance of heterozygosity 86
  to compare nucleotide divergence to restriction sites 317
  to determine allelic selection 51–52
  to estimate melting temperature of DNA 236
  to estimate optimum sample size 85–86
  to estimate significance of chi-square values 152
Conjugation 411–413
Coturnix japonica see Japanese quail
Crassostrea gigas see Pacific oysters
Crassostrea virginia see American oysters
Culling, independent 316
Cycling 329

D

Deer, evolutionary relationships among genera 266–273

Deer mice, coat color genetics 304–307
Denaturing gradient gel electrophoresis 148
Diploidy, origin of 360–371
Disequilibrium, gametic 431–437
DNA *see also* Mitochondrial DNA analysis
  maternal inheritance of chloroplast 218–220
  program for estimating melting temperature of 236
  repair hypothesis of transformation 400–404
  repetition, in Percidae 70–73
  variation, in orang utans 405–409
DNA fingerprinting
  of butterflies 195–200
  of humpback whales 281–290
  to determine relationship coefficients 166–169
Drosophila buzzatii
  genetics and linkage mapping 188–194
  list of mutants 193–194
Drosophila melanogaster, chromosomal analysis 63–66
Dyserythropoiesis and dyskeratosis, in Polled Hereford cattle 263–265
DXY program 317

E

Eggshell pigments, analysis of 146–147
Elephant seals, population bottlenecks 443–449
Enterocytes, toxigenicity of pathogenic *E. coli* to 157–165
Environment, varying
  sex and recombination in 345–350
Environmental deterministic hypotheses 377–380
Environmental stochastic hypotheses 376–377
Escherichia coli, receptors in swine 157–165
Esterase-1,2 gene, in rats 149–151
Eucalyptus nitens, inheritance of chloroplast DNA 218–220
Eukaryotes, evolution of sexual cycle 351–359
European beech, inheritance of isozymes 291–296
Evolutionary conservatism 122

F

Fagus sylvatica see European beech
Fertilization, differential 13
Fitness
  effect of mutation accumulation on 339–344
  effect of shift in reproduction on 346–347
  population 321–325
Fixation, of mutant alleles 321–325
Flax, isozyme polymorphism 73–78
Flow cytometry, to analyze genome size 123, 428
Flower development, mutation in soybean 97–104
Fluorescent in situ hybridization 301–304
Fruit formation, as a measure of reproductive isolation 14

G

Gallus domesticus see Chickens
Garden peas, linkage similarities to lentils 131
Gazella subgutturosa see Sand gazelles
G-banding
  of antelope chromosomes 481–482
  of gazelle chromosomes 479
  of orang utan chromosomes 406
  of tick chromosomes 233
Genbank database 274
Gene flow, in cat populations 173–180
Genetic diversity, role in success of sexual populations 393
Genetic drift 173, 375
Genetic exchange
  among prokaryotes 352–353
  effect on organelle evolution 415–418
Genetic similarity, and relationship coefficient 166–169
Genetic simulation, software for 237
Genome organization, in Percidae 70–73
Genome size
  of catfish hybrids 122–125
  using flow cytometry to analyze 123, 428
Germplasm conservation, program for estimating optimum sample size 85–86
Glycine max see Soybeans
Goats, localization of interferon genes 301–304
Graft-versus-host reaction 43
GREGOR 237
Growth, genetic and parental factors 184–187
Guanine plus cytosine content, program for estimating 236
Gynogenesis, in oysters 311–315

H

H1 histone, in lentils 131–133
Half-sib families
  of catfishes 122–125
  testing for linkage in 43–48
Haptoglobin gene, in rats 149–151
Herbicides
  inheritance of reaction to 21–24
  resistance to 91–96
Hessian fly
  resistance genes in wheat 142–145
  white-eye mutation 229–232
Heterorhabditis bacteriophora, morphological mutant of 475–478
Heterozygosity
  association with fitness 254, 256–258
  levels in domestic cats 178
  program for calculating variance in 86
Heterozygosity paradox 254
Hippotragus niger see Sable antelopes
Homeosis, in soybean flower development 97–104
Honeybees, linkage studies of 129–131
Hordeum vulgare see Barley
Horizontal starch gel electrophoresis 292
Host-parasite interaction 328–338
Host-plant resistance 229
Humpback whales, DNA fingerprinting of 281–290
Hybridization
  in barley 78–82
  interspecific 13
  quantifying 1

I

Ictaluridae, genome size of hybrids 122–125
Idiomorphs 353
Immediate benefit hypothesis 373–374
Inbreeding depression, in African wild dogs 451
Independent segregation, of honeybee markers 129–131
Index selection, program for updating 316
Indian Peafowl, inheritance of plumage color patterns 57–62
INDUPDAT 316
In situ hybridization
  of alloplasmic wheat 127
  of barley 78–79
  of MUC gene 260
Interferon genes, localization of 261–262, 301–304
Internodal elongation, in rice 201–205
Introgression
  cytoplasm-specific 126–128
  quantifying 1
In vitro adhesion assay 158–159
Iris, pollen competition 13–16
Isozyme analysis, of Sitka spruce 206–207
Isozyme polymorphism, in flax 73–78

J

Japanese quail
  eggshell color mutation 145–147
  plumage color genes 222–225, 225–228

K

Karyotype stability, in barley 105–108
Kinship coefficients, software for computing 238
Koinophilia 396–399

L

β-lactamase 326
Lactation, eutherian 460
Lactation proteins, of tammar wallaby 460–465
Leguminosae, compound leaf formation 17–20
Lentils (*Lens culinaris*), histone and cotyledon protein loci 131–133
Linkage analysis
  of half-sib families 43–48
  of isozyme polymorphisms in flax 73–78
  in *Pomoxis* 116–121
  of resistance genes in soybeans 109–111
Linkage group conservation 116
  in *Drosophila* 188–194
Linum usitatissimum see Flax
Lycaon pictus see African wild dogs

M

Macropus eugenii see Tammar wallaby
Maize
  catalase-3 gene 133–135
  marker systems for B-A translocations 135–138
  susceptibility to nicosulfuron 216–217
Malaria vector, population differentiation of 248–253
Manx gene, expressivity 170–172
Marsupials
  blood groups 181–183
  lactation 460
Maximum likelihood estimates 43
Mayetiola destructor see Hessian fly
Mediterranean fever, familial 438
Megaptera novaengliae see Humpback whales
Meiosis, parasitic origin of 356–357
Melanin synthesis, defective in sheep 67–69
Melting temperature, of DNA
  program for estimating 236
Metobromuron, reaction of beans to 21–24
Mice *see also* Deer mice; White-footed mice
  allelic selection in 49–56
  synergy between skeletal mutations 466–474
Microelectrophoretic technique 254–256
Microsatellite repeats 274–280
Minisatellite loci, evaluating 166–167
Mirounga angustirostrus see Elephant seals
Mitochondrial DNA analysis 249, 444, 452–453
Mitosis, chromosome behavior during 78–82
Molecular evolution, effect of breeding system on 321–325
Molecular markers, to estimate parental species 1–12
Mollusks, natural selection in 254–258
Monodelphis domestica see Short-tailed opossums
Monosomy, perpetual 126–128
Monte Carlo simulations 4
Mosquitos *see Aedes aegypti*; *Anopheles aquasalis*
Mucin gene, analysis of 259–262
Muller's ratchet 321–325, 339–340, 380, 391–392
Multipolar systems, dynamics of 355–356
Mutation accumulation
  in asexual populations 339–344
  in finite populations 321–325
Mutational deterministic hypothesis 380–381
Mutational meltdown 339–344
Mutational stochastic hypothesis 380

N

Nanomelia, screening for 147–149
Natural selection
  in olive trees 34
  in oysters 254–258
  in wild barley 29
Neisseria, resistance to penicillin 326–327
Nematodes, entomopathogenic mutant 475–478
Nicosulfuron herbicide, susceptibility of maize to 216–217
Nodulation, linkage of genes controlling 140–142
Nor-optimal selection 346
Nucleotide divergence, program for comparing restriction sites to 317
Nucleotide diversity, of mosquito populations 250

O

Olive trees (*Olea europaea*), leaf allozyme variation 34–42
Orang utans, chromosomal and mitochondrial DNA variation 405–409
Organelle evolution, effects of genetic exchange on 415–418
Oryza see Rice
Outbreeding, sexual 411–412
Ovis aries see Sheep
Ovule abortion, in pearl millet 213

P

Pacific oysters, artificial gynogenesis in 311–315
Panmixia 173–180
Parasites
  domestication by vertical transmission 357–358
  transmission by mosquitos 245–246
Parental care, effect on growth 184–187
Paspalum densum see Vaseygrass
Pavo cristatus see Indian Peafowl
Pearl millet
  female sterile mutant 112–115
  fertility of hybrids 213–216
Pedigree analysis 43
Penicillin-binding proteins 326
Percidae, variation in genome organization 70–73
Peromyscus leucopus see White-footed mice
Peromyscus maniculatus see Deer mice
Persea americana see Avocados
Phaseolus vulgaris see Common beans
Phenetic analysis, of deer 267–268
Phenotypic plasticity, in rice 201–205
Phytophthora, resistance of soybeans to 110–111
Picea sitchensis see Sitka spruce
Pigeons, growth of 184–187
Pigs *see* Swine
Pisum sativum see Garden peas
Plant regeneration, in barley 105–108
Pleiotropism 17
Plumage color
  inheritance in peafowl 57–62
  mutations in Japanese quail 222–225, 225–228
Poeciliopsis, clones versus maintenance of sex 388–395
Polled Hereford cattle, congenital diseases of 263–265
Pollen competition, in *Iris* 13–16
Polyacrylamide gel electrophoresis 461
Polygene storage concept 337
Polygenic inheritance, Mather's model 345–346
Polymorphism, permanent dynamic 328–338
Polyploidization 427–430
Pomoxis, linkage analysis of 116–121
Pongo pygmaeus see Orang utans
Population bottlenecks, simulation models to investigate 443–449
Population differentiation, of *Anopheles aquasalis* 248–253
Populations, finite
  fluctuating selection in 377
Populus tremuloides see Trembling aspen
Postoviposition parental effect 184–187
Protein electrophoresis 267–268
Pseudo-probability tests 152

R

Rats (*Rattus norvegicus*), uncoupling protein 149–151
R-banding 302
  of gazelle chromosomes 479
  of sable antelope chromosomes 481–482
Reassociation analysis 71
Recessivity 63, 69
Recombinant progeny 401
Recombination
  effect on molecular evolution 321–325

interspecific 1
in long-term selection 63
in temporally varying environments 345–350
role in evolution of bacteria 326–327
Redundancy 361
Relationship coefficient, and genetic similarity 166–169
Renal amyloidosis, in Shar-pei dogs 438–442
Reproductive isolation, in *Iris* 13–16
Restriction length polymorphism analysis 241–246
of aspen allozymes 420–421
of barley 29
of maize 133
of mosquito mitochondrial DNA 249
of mucin gene 260–261
Restriction sites, program for comparing nucleotide divergence to 317
Retroviruses 353
Rhagoletis, gametic disequilibrium in 431–437
Rice, phenotypic plasticity 201–205
Rust, resistance of flax to 73
Rye, hybrids with wheat 126–128

S

Sable antelope, karyotype 481–484
Sample size, program for estimating optimum 85–86
Sand gazelles, chromosomal polymorphism 478–481
Satyridae, DNA fingerprinting of 195–200
Secale cereale see Rye
Seed proteins, perchloric acid soluble 131–133
Segregation analysis
in butterflies 196
of marsupial blood groups 182
postproband 264
Segregation ratios 243–246
Selection *see also* Natural selection
epistatic 375
hard versus soft 331
Sex *see also* Amphimixis
bi-gender 397–399
determination 244–246
evolution of 345–350
maintenance of 388–395
Shar-pei dogs, renal amyloidosis in 438–442
Sheep
albinism in 67–69
localization of interferon genes 301–304
Short digits mutation, in mice 466–474
Short-tailed opossums, blood groups 181–183
Sitka spruce, isoenzymes of 206–211
Skeletal mutations, in mice 466–474
Social behavior, effect on mammalian populations 173–174, 179
Sorghum, cytological and morphological relationships between species 484–489
Soybeans
homeosis in flower development 97–104
isozymes of 489–492
linkage group 19, 109–111
mutation for flower pigmentation 297–300
nodulation-response loci 140–142
resistance to soybean mosaic virus 25–28
Sterility 97–104, 112–115, 220–222, 233
Streptococcus, resistance to penicillin 326–327
Swine (*Sus domestica*)
microsatellite repeats 274–280
receptors for pathogenic *E. coli* 157–165
Symbionts, molecular 410–414
Sympatric speciation controversy 431
Synergy, between skeletal mutations in mice 466–474
Syngamy, evolution of 412

T

Tammar wallaby, lactation protein 460–465
Thermal kinetic analysis 71
Threshold concept, of anomaly expression 466
Ticks, homology within X chromosomes 232–235
Traits
fitness of 396–397
optimal value of 345–350
Transformation
DNA repair hypothesis of 400–404
evolution of 365–371
Translocations, in maize 135–138
Transposons *see also* Symbionts, molecular
as parasites of eukaryotes 353
Trembling aspen, allozymes of 419–424
Triticum aestivum see Wheat
Tyrosinase, defective in sheep 68–69

U

Uncoupling protein gene, in rats 149–151

V

Variance, in backcrossing programs 212–213
Variegation, in *Arabidopsis* 138–140
Vaseygrass, cytology and reproduction 220–222

W

w4 locus, of soybean 297–300
Wheat
Hessian fly-resistance genes 142–145
nuclear introgression in 126–128
White-footed mice, coat color genetics 306–311

Z

Zymogram analysis, of olive trees 34

Title Index

A

AIDS: The Modern Plague: The President's Symposium for 1991 (book review) 153–154
Albinism in a Suffolk sheep 67–69
Allelism of panda and dotted white plumage genes in Japanese quail 225–229
Analysis of the evolution and genetic diversity within and between Balearic and Iberian cat populations 173–180
Artificial gynogenesis in the Pacific oyster, *Crassostrea gigas*: II. Allozyme inheritance and early growth 311–315

B

Behavior of parental genomes in the hybrid *Hordeum vulgare* × *H. bulbosum* 78–82
Blood groups in a marsupial (*Monodelphis domestica*) 181–183

C

Catalase-3 (*Cat3*) gene mapped to the long arm of chromosome 4 in maize (*Zea mays* L.) 133–135
Celadon: an eggshell color mutation in Japanese quail 145–147
Chromosomal analysis of *D. melanogaster* long-term selected lines 63–66
Chromosomal localization of omega and trophoblast interferon genes in goat and sheep by fluorescent in situ hybridization 301–304
Chromosomal location of Hessian fly-resistance genes *H22, H23,* and *H24* derived from *Triticum tauschii* in the D genome of wheat 142–145
Chromosomal and mitochondrial DNA variation in orang utans 405–409
Chromosomal polymorphism in sand gazelles (*Gazella subgutturosa marica*) 478–481
Chromosomal variations in immature embryo-derived calli from six barley cultivars 105–108
Classification of hypotheses on the advantage of amphimixis 372–387
Coat color genetics of *Peromyscus*: II. Tan streak—a new recessive mutation in the deer mouse, *P. maniculatis* 304–306
Coat color genetics of *Peromyscus*: III. Golden-nugget—a recessive trait in the white-footed mouse, *P. leucopus* 306–311
Computer program for calculating within-population variance of heterozygosity 86
Cytological and morphological relationships between *Sorghum laxiflorum* and *S. bicolor* 484–489
Cytology and reproduction of *Paspalum densum* and its genomic relationship with *P. intermedium* and *P. urvillei* 220–222

D

DNA fingerprinting in a butterfly, *Bicyclus anynana* (Satyridae) 195–200
DXY: a program for jackknifed comparisons between estimates of nucleotide divergence from restriction sites 317

E

The effects of different levels of genetic exchange on organelle evolution 415–418
Elephant seal genetic variation and the use of simulation models to investigate historical population bottlenecks 443–449
Epidemiologic findings in congenital anemia, dyserythropoiesis, and dyskeratosis in Polled Hereford calves 263–265
Estimating the frequencies of genetically distinct classes of individuals in hybridized populations 1–12
The evolution of sex and recombination in a varying environment 345–350
Evolutionarily stable meiotic sex 396–399
Expressivity of the Manx gene in cats 170–172

F

Female sterile mutant in pearl millet: evidence for initiation of apospory 112–115
Further linkage studies with biochemical markers in *Apis mellifera* 129–131

G

Gametic disequilibrium between allozyme loci and sex chromosomes in the genus *Rhagoletis* 431–437
Genes for breakfast: the have-your-cake-and-eat-it-too of bacterial transformation 400–404
Genetic analysis of evolutionary relationships among deer (subfamily Cervinae) 266–273
Genetic analysis of the gene for porcine submaxillary gland mucin: physical assignment of the MUC and interferon γ genes to chromosomes 5, 259–262
Genetic analysis of variegated mutants in *Arabidopsis* 138–140
Genetic control of isoenzymes in Sitka spruce 206–211
Genetic and developmental bases for phenotypic plasticity in deepwater rice 201–205
Genetic error, sex, and diploidy 360–371
Genetic independence of the nodulation-response gene loci—*Rj1, Rj2,* and *Rj4*—in soybean 140–142
Genetic and linkage analysis of isozyme polymorphisms in flax 73–78
Genetic and posthatch parental influences on growth in pigeon squabs 184–187

Genetic similarity using DNA fingerprinting in cattle to determine relationship coefficient 166–169
Genetics and linkage mapping of *Drosophila buzzatii* 188–194
Genetics of skin color, flowering group, and anise scent in avocado 82–84
GREGOR: software for genetic simulation 237

H

Haploid dynamic polymorphism in a host with matching parasites: effects of mutation/subdivision, linkage, and patterns of selection 328–338
Homology within the X chromosomes of *Boophilus microplus* (Canestrini) and *B. annulatus* (Say) 232–235

I

INDUPDAT: a SAS/IML program for selection index updating 316
Inheritance, allelism, and morphological characterization of unifoliate mutations in common bean 17–20
Inheritance and genetic linkage studies of isozymes in soybean 489–492
Inheritance of isoenzymes in European beech (*Fagus sylvatica* L.) 291–296
Inheritance and linkage of allozymes and restriction fragment length polymorphisms in trembling aspen 419–424
Inheritance of reaction to metobromuron herbicide in common bean (*Phaseolus vulgaris* L.) 21–24
Inheritance of renal amyloidosis in Chinese Shar-pei dogs 438–442
Inheritance of susceptibility to nicosulfuron herbicide in maize 216–217
Inheritance and variation of genome size in half-sib families of hybrid catfishes 122–125
Inheritance of the white and pied plumage color patterns in the Indian Peafowl (*Pavo cristatus*) 57–62
Interspecific pollen competition and reproductive isolation in *Iris* 13–16
Isolation and genetic analysis of triazolopyrimidine-resistant mutant of *Arabidopsis* 91–96

K

KIN: software for computing kinship coefficients 238

L

Large differences in genetic variation of multigene families in barley 29–33
Leaf allozyme variation in cultivated and wild olive trees (*Olea europaea* L.) 34–42
Light down—dominant plumage color mutation with homozygous lethality in Japanese quail 222–225
Linkage analysis of 10 enzyme loci in the genus *Pomoxis* (Pisces: Centrarchidae) 116–121
Linkage of the gene for uncoupling protein to esterase-1,2 and haptoglobin in the rat 149–151
Linkage of loci encoding H1 histone and a cotyledon protein in lentil 131–133
Linkage map for *Aedes aegypti* using restriction fragment length polymorphisms 241–247

M

The making of a fly: the genetics of animal design (book review) 318
Marker systems for B–A translocations in maize 135–138
Microsatellite repeats in pig (*Sus domestica*) and chicken (*Gallus domesticus*) genomes 274–280
Molecular genetic and morphological analyses of the African wild dog (*Lycaon pictus*) 450–459
Molecular symbionts and the evolution of sex 410–414
Morphological mutant in the entomopathogenic nematode, *Heterorhabditis bacteriophora* 475–478
Mutation accumulation in finite populations 321–325
The mutational meltdown in asexual populations 339–344

N

A new allele at the *w4* locus derived from the *w4-m* mutable allele in soybean 297–300
A noncompensating wheat-rye translocation maintained in perpetual monosomy in alloplasmic wheat 126–129
A novel morphological mutation in the Hessian fly, *Mayetiola destructor* 229–232

O

The origin and evolution of clones versus the maintenance of sex in *Poeciliopsis* 388–395
Origin of late lactation protein from β-lactoglobulin in the tammar wallaby 460–465
Overdominance in early life stages of an American oyster strain 254–258

P

Population characteristics of DNA fingerprints in humpback whales (*Megaptera novaeangliae*) 281–290
Population differentiation of the malaria vector *Anopheles aquasalis* using mitochondrial DNA 248–253
Possible homeosis in flower development in cultivated soybean [*Glycine max* (L.) Merr.]: morphoanatomy and genetics 97–104
Program for estimating the melting temperature and the guanine plus cytosine content of DNA 236–237
A program for estimating the optimum sample size for germplasm conservation 85–86

R

Reproduction, cytology, and fertility of pearl millet × *Pennisetum squamulatum* BC_4 plants 213–216
Resistance to soybean mosaic virus conferred by two independent dominant genes in P1 486355 25–28
Restriction map and maternal inheritance of chloroplast DNA in *Eucalyptus nitens* 218–220
The R- and G-banded karyotypes of the sable antelope (*Hippotragus niger*) 481–484
The role of sex in bacterial evolution 326–327

S

Screening for carriers of the avian cartilage proteoglycan core protein defect, nanomelia, by denaturing gradient gel electrophoresis 147–149
The search for the gene (book review) 239
The sexual nature of the eukaryote genome 351–359
Soybean genes *Rj2, Rmd,* and *Rps2* in linkage group 19, 109–111
Strong allelic selection in the course of brother × sister matings in mice 49–56
Studies in swine on inheritance and variation in expression of small intestinal receptors mediating adhesion of the K88 enteropathogenic *Escherichia coli* variants 157–165
Synergistic interactions between two skeletal mutations in mice: individual and combined effects of the semidominants cleidocranial dysplasia (*Ccd*) and short digits (*Dsh*) 466–474

T

Testing for linkage between a marker locus

and a major gene locus in half-sib families 43–48
Three ploidy levels indicated by genome quantification in Acipenseriformes of North America 427–430
Two programs to estimate significance of χ^2 values using pseudo-probability tests 152

V

Variation in genetic composition in backcrossing programs 212–213
Variation in genome organization and composition of repeated DNAs among three species of fish (family: Percidae) 70–73
